HORTICULTURE PROGRAMS HELP GOOD THINGS GROW

Horticulture Programs Help Good Things Grow

What's green and helps young people flourish? Plants!

“In the greenhouse, we’re always working on social skills,” says Megan Sperry, horticulture instructor. “Working with plants teaches youths how to get along with others, ask for help when needed and do something even if you don’t want to. We work on both hard skills and soft skills, and you need both to be successful in the world.”

Cultivating plants is so much more than digging in the dirt. Three of our programs help participants get their hands dirty—and gain knowledge and confidence in the process. And all of these programs are possible thanks in part to our annual plant sale.

Thyme for Kids Plant Sale

Get ready for spring planting and shop our Thyme for Kids Plant Sale from April 13–20. Grown with love by youth in horticulture therapy, the plants, flowers, and herbs sold at our

plant sale each year make the perfect addition to your workspace, kitchen, or garden! You can also purchase items built by the youth in our [Build Trybe](#) program to support the young apprentices learning employable skills in the culinary, construction, and horticulture fields.
